The present invention is to provide a method for downloading documents by using multimedia messaging of a wireless communication device, which employs a personal computer to connect with Internet and to send and receive multimedia messages, wherein the multimedia messages to be sent and received are represented as downloaded documents by using the simultaneous media integration language, and are transmitted to a designated wireless communication device via a network server. The wireless communication device recognizes that the multimedia message being received is a downloaded document and sends out a response to the network server, and then stores or displays the downloaded document.
